

Canadian Network of Asset Managers
Board Election Submission
Attn: Nominating Committee

Katie Geoghegan

Board Position: Non-Public Director

Current Professional Role & Responsibilities:

As Asset Management Specialist for Associated Engineering, I lead our BC operation's asset management advisory services practice. Our work with municipalities, First Nations, utilities, ports and other asset owners and operators include a variety of projects. These include:

- Asset management practice assessment and program development
- Governance and organizational development
- Structured decision-making processes for capital and operational planning
- Asset management planning
- Levels/cost of service development
- Risk evaluation and management
- Operations and maintenance management support
- Technology requirements, selection and evaluation

Working with my colleagues, I support the integration of asset management principles with our engineering, operations, climate planning and community resilience practices.

Related Experience:

My experience has focused primarily on infrastructure asset management. I have had the opportunity to work in a variety of roles:

- Consulting with municipalities from BC to Ontario with policy, finance, HR, engineering and sustainability teams to develop asset management programs and practices

Canadian Network of Asset Managers

Board Election Submission

Attn: Nominating Committee

- Consulting with energy, utilities, social service, First Nations, port and provincial government sector organizations on business transformation projects (including and beyond asset management)
- Standing up a corporate asset management program as the municipal Asset Management lead
- Development and support of asset and materials management processes and implementation of CMMS / ERP technology in municipal and energy sectors

Interest & Vision for CNAM:

CNAM has proven itself as a connector of asset management practitioners, advocates and enthusiasts. As we progress into uncertain times, it is more important than ever for CNAM to evolve what and how it delivers to meet the needs of the practice and its professionals. This includes:

- Enabling virtual delivery of professional development to a wider audience
- Building networks across the CNAM membership focused on solving problems and/or advancing development and research
- Educating members on technology, research and leading-edge practices new to them
- Providing an integrated view of asset management that connects with organizational context and other industries / professions
